NEW - VAM (Variable Air Management)

Adjusting CFM's to meet local building codes is easy with the new **Variable Air Management (VAM)** feature on certain Faber models. VAM aids in helping the installer set the speed **permanently** to a lower CFM based on local make up air codes. Our exclusive VAM technology allows you to adjust your hood to the most common **CFM levels: 295, 395 or 600** class performance. VAM is pre-installed in 13 models and with a few simple pushes of the control buttons the hood is programmed and permanently set to the CFM level for your market.

Note: Always check local make up air code requirements.

Faber Facts - Seamless Island Chimneys

Faber seamless chimneys
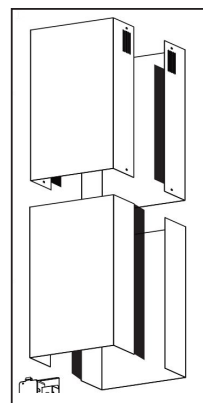

Other chimneys with seams

Faber island hoods have upper and lower chimneys with seamless single piece construction for easy installation and a clean look. Other brands use multiple chimney parts with extra seams which adds installation time.

INCA PRO PLUS Pro Liner Range Hood (Choose your CFM - Internal or Remote Mounted Blowers)

* Use your own external blower, purchased separately, rated 4.2 amps maximum, suitable for use with solid state variable speed control. If you are using your own external blower with this hood, you need to order the **INLBKIT** to connect to the hood
