PRODUCT GUIDE **2022**

Why Falmec.

Falmec style: Perfect balance between aethetic and function.

Thanks to research and collaboration with leading designers, Falmec gives life to a variety of products designed to meet every taste and desire with elegance, attention to details and ergonomics, without compromising functionality.

The real "Made in Italy" since 1981.

Each Falmec product is designed, developed and made entirely in Vittorio Veneto, Italy (near Venice). From the initial concept, to the choice of materials, up to the final product, a constant search for perfection in every production stage is at work that today leads Falmec to be the qualitative reference in the world of extractor hoods.

Life inspired: Technologies & Innovations.

Carbon.Zeo

Filtering innovation. Charcoal and Zeolite:
filtering the way nature intended it to be. A Falmec exclusive, it uses materials of natural origin such as zeolite and activated charcoal to absorb odours with utmost effectiveness. It can last up to 3 years with normal use, and can be regenerated every 18 months.

Silence, the importance of acoustic comfort.

The Noise Reduction System (NRS) is the technology developed by Falmec that enabled them to create extremely quiet hoods. The NRS hoods reduce noise by up to 86% in sound level while giving the best results in removal of cooking fumes.

NOISE REDUCTION SYSTEM
NRS®

Speed reduction system - SRS.

The SRS system reduces the maximum air flow rate that can be set in the hood to make the hood compliant to local building regulations.

FILTRATION

Anti-grease Filters.

Metallic Filters.

These filters have an internal multi-layer aluminum structure of corrugated mesh to maximize the filtering surface.
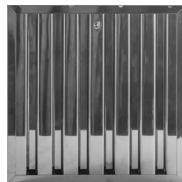

Professional Baffle Filters.

Professional baffle filters come standard in all hoods in the Professional Collection. Their criss-cross structure effectively collects oils and vapors that can easily be removed and cleaned.
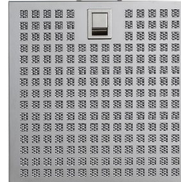

Top Filters.

Much like the Metallic Filters, the Top Filters effectively trap grease with the addition of a "chessboard" frame in Scotch Brite steel.

Anti-odor filters.

Active Charcoal Filters.

Charcoal filters contain active carbons that absorb odors created by cooking. It is recommended to be replaced at least every 4 months.

Type 3 (rectangular) code FFCHASQC0BL
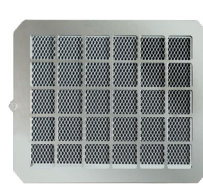

Type 2 (round) code FFCHAR2C0BL (pair)

Type 6 (round) code FFCHAR3C0BL (pair)

Combined High Performance Filters (Silence - NRS Collection).

Wash in dishwasher with your usual detergent at a temperature not exceeding 149°F, if possible with no other contents. After washing, regenerate the filter in the oven at 176°F for 20 minutes.

FILTERING INNOVATION

Accessories for better filtration.

Carbon.Zeo
technology.

Carbon.Zeo filters use active carbon and zeolite - a natural volcanic mineral - that are proven to be highly effective in absorbing fumes and odors. When in contact with vapors, zeolite releases heat that help reduce moisture caused by cooking.

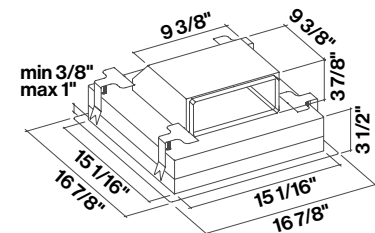

Ceiling.

Ceiling filter unit kit.

This kit enables Falmec ceiling hoods to be installed in recirculation mode. This is installed flush-mounted on the same false ceiling area as the hood. And thanks to the white painted steel frame and white satin glass inner panel, it integrates harmoniously with the kitchen environment.
