

falmec
Life inspired.

PRODUCT GUIDE **2025**

Why Falmec.

Falmec style: Perfect balance between aesthetic and function.

Thanks to research and collaboration with leading designers, Falmec gives life to a variety of products designed to meet every taste and desire with elegance, attention to details and ergonomics, without compromising functionality.

The real “Made in Italy” since 1981.

Each Falmec product is designed, developed and made entirely in Vittorio Veneto, Italy (near Venice). From the initial concept, to the choice of materials, up to the final product, a constant search for perfection in every production stage is at work that today leads Falmec to be the qualitative reference in the world of extractor hoods.

Life inspired: Technologies & Innovations.

Filtering innovation.

Charcoal and Zeolite: filtering the way nature intended it to be. A Falmec exclusive, it uses materials of natural origin such as zeolite and activated charcoal to absorb odours with utmost effectiveness. It can last up to 3 years with normal use, and can be regenerated every 18 months.

Carbon.Zeo::

Silence, the importance of acoustic comfort.

The Noise Reduction System (NRS™) is the technology developed by Falmec that enabled them to create extremely quiet hoods. The NRS™ hoods reduce noise by up to 86% in sound level while giving the best results in removal of cooking fumes.

Speed reduction system - SRS.

The SRS system reduces the maximum air flow rate that can be set in the hood to make the hood compliant to local building regulations.

Winner of Prestigious Awards

Spanning over 4 decades of developing unique designs and technological innovations have earned Falmec's extractor hoods numerous world-renowned awards, showcasing their commitment to enhancing quality of life at home.

Circle.Tech: The New Shape of Filtration

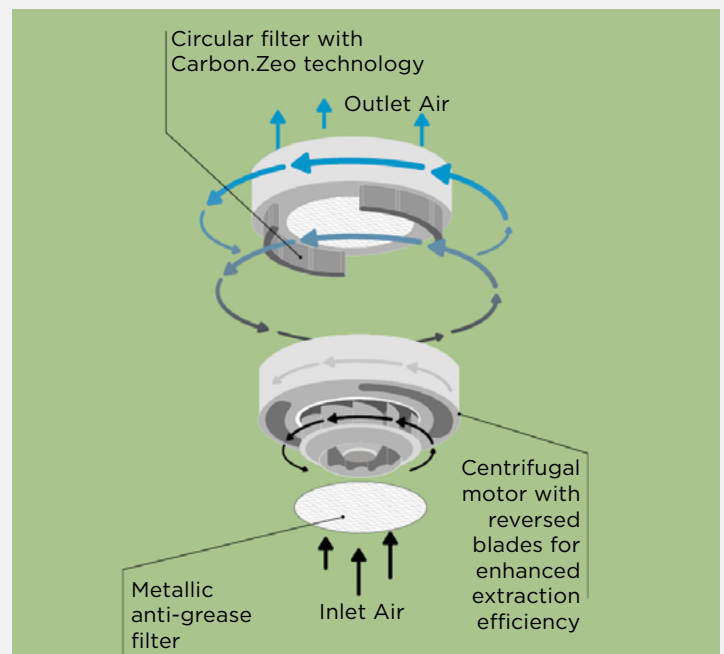

Circle.Tech, a certified and patented technology.

Unlike traditional cooker hoods, Circle.Tech filtering units extract air horizontally rather than vertically. The outflowing air passes through a filtering unit (powered by Carbon.Zeo technology) surrounding the motor and is evenly distributed. Given its circular shape, the filtering surface reaches the maximum extension, thus achieving excellent performances in terms of suction capacity, top filtering results and extreme quietness.

Indeed, balanced distribution of outflowing air reduces turbulence and, consequently, the noise produced by the hood.

A unique innovation in several different shapes.

Circle.Tech is available
in these fine hoods:

AFRODITE

MODEL	CODE	WIDTH	CFM
AFRODITE	FPAFX30W6SS	30"	600
AFRODITE	FPAFX36W6SS	36"	600

FEATURES

- ScotchBrite stainless steel AISI 430
- 3-speed slider controls
- LED lighting: 2 X 1,2W
- Metallic filters, removable and washable
- Optional round charcoal filter, Type 6 (FFCHAR3C0BL)

LINE PRO NRS™

MODEL	CODE	WIDTH	CFM
LINE PRO NRS™	FNLIN30W6SS	30"	600
LINE PRO NRS™	FNLIN36W6SS	36"	600

FEATURES

- ScotchBrite stainless steel AISI 304
- NRS™ technology for a quieter kitchen
- 4-speed touch controls + 24h function
- LED strip lighting
- Auto delay shut-off function
- Clean filter reminder Professional baffle filters
- Optional Carbon.Zeo filter kit for T-shaped wall hood (KACL.948#IF)
- Optional Carbon.Zeo filter kit, vertical outlet ceiling (KACL.953#BF)
- Optional Carbon.Zeo Filter (KACL.961)
- Optional duct extension H=70cm (KACL.570#I) / H=96cm (KACL.571#I)

LUMEN

MODEL	CODE	WIDTH	CFM
LUMEN	FDLUM36W5SS-R	36"	500

FEATURES

- Speed Reduction System (SRS)
- ScotchBrite stainless steel AISI 304
- 4-speed electronic controls
- LED strip lighting
- LED ambient light
- Auto delay shut-off function
- Air Falmec filter for balanced suction, removable and washable
- Optional Carbon.Zeo filter kit for T-shaped wall hood (KACL.948#IF)
- Optional square charcoal filter, Type 3 (FFCHASQC0BL)
- Optional duct extension H=70cm (KACL.510#I) / H=96cm (KACL.512#I)

Specifications and features may vary. Please refer to the manufacturer's website for the latest updates.

Specifications and features may vary. Please refer to the manufacturer's website for the latest updates.

FILTRATION

Anti-grease Filters.

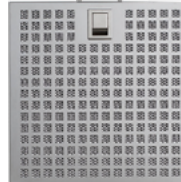

Metallic Filters.

These filters have an internal multi-layer aluminum structure of corrugated mesh to maximize the filtering surface.

Professional Baffle Filters.

Professional baffle filters come standard in all hoods in the Professional Collection. Their criss-cross structure effectively collects oils and vapors that can easily be removed and cleaned.

Top Filters.

Top grease filters maintain the high retention performance of the metal filters with the addition of a "chessboard" external frame in Scotch Brite steel with a smooth surface that facilitates cleaning and at the same time qualifies the aesthetic appearance..

Anti-odor filters.

Active Charcoal Filters.

Charcoal filters contain active carbons that absorb odors created by cooking. As the filters become less efficient with time, it is recommended to be replaced at least every 4 months.

Type 3 (rectangular)
code FFCHASQC0BL

Type 2 (round)
code FFCHAR2C0BL (pair)

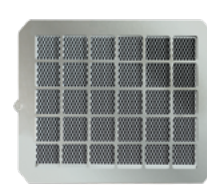

Type 6 (round)
code FFCHAR3C0BL (pair)

Combined High Performance Filters (Silence - NRS™ Collection).

Wash in dishwasher with your usual detergent at a temperature not exceeding 149°F, if possible with no other contents. After washing, regenerate the filter in the oven at 176°F for 20 minutes.

Verso NRS™
code KACL.959

Carbon.Zeo Filters.

The Carbon.Zeo combined filter has a guaranteed minimum life of 3 years, but is expected to last 5 years under conditions of normal use. We recommend that it be regenerated every 18 months by placing it in an oven at 392°F for two hours.

FILTERING INNOVATION

Accessories for better filtration.

Carbon.Zeo technology.

Carbon.Zeo filters use natural materials such as active carbon and zeolite, a mineral of volcanic origin with a microporous crystalline molecular structure that absorbs fumes and unpleasant odors.

On contact with the flow of vapors, zeolite releases heat, helping to reduce moisture caused by cooking.

The Carbon.Zeo combined filter has a guaranteed minimum life of 3 years, but is expected to last 5 years under conditions of normal use. The filter should be regenerated every 18 months by placing it in an oven at 392°F for two hours.

Ceiling.

Ceiling filter unit kit.

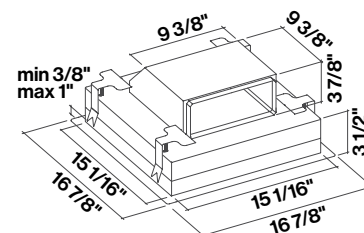

This kit enables Falmec ceiling hoods to be installed in recirculation mode. This is installed flush-mounted on the same false ceiling area as the hood. And thanks to the white painted steel frame and white satin glass inner panel, it integrates harmoniously with the kitchen environment.

This solution combines aesthetic elegance with outstanding filter performance with a Carbon.Zeo filter.

FALMEC WARRANTY INFORMATION FOR RESIDENTIAL USE ONLY

ONE-YEAR PRODUCT & PARTS WARRANTY

For one year from the original date of purchase the Falmec product and parts, warranty covers all parts and labor to repair or replace the product, under normal residential use, any part of the product proving to be defective in material or workmanship.

Falmec warranty will repair or replace any parts at no cost to the consumer if material defects or workmanship caused the damage or failure of these components.

This warranty is valid on only the 50 continental states of the U.S.A. and the country of Canada.

This warranty applies to the original purchaser only and is non-transferable. All service provided by Falmec on the stated warranty must be performed by a Falmec authorized servicer, unless otherwise specified by Falmec. This service would be provided during the regular business hours of each specific region.

This warranty applies only to products installed for normal residential use and does not apply to commercial use. This warranty only covers service performed at the location of product installation and will not cover costs associated with repairing off-site unless expressly authorized by Falmec nor does it cover the travel costs associated with providing service to remote locations. Remote locations are defined as being outside the established territory of the assigned service company. This warranty does not cover any parts or labor to correct any defect caused by negligence, transport, delivery, installation, accident or improper use, maintenance, installation, service or repair.

The warranty will be valid and effective only upon presentation of the document stating the **purchase date of the appliance, and more specifically of the relevant invoice, proof of purchase, or equivalent document showing the name of the seller, the delivery date and the identification data of the appliance** (Such as Model Number, Serial Number). In the case of new product being included in the purchase of new residential construction: **this warranty applies to the original resident of the location** containing the Falmec product, and warranty coverage will begin on the date of occupancy of the residence (proof of occupancy required) to a maximum additional six months from the date of purchase of the product by the development company from the distributor or dealer.
